

(x, y), z, a, b, c, where:

$x = \cos$   
 $y = \sin$   
 $z = \tan = \frac{\sin}{\cos}$   
 $a = \cot = \frac{1}{\tan} = \frac{\cos}{\sin}$   
 $b = \csc = \frac{1}{\sin}$   
 $c = \sec = \frac{1}{\cos}$
